Hello.

Here is submission summary.

Track Name: Advanced Analytics and AI Integration

Paper ID: 1905

Paper Title: Ai-Driven Customer Intelligence System for Strategic Business Decision Making

Abstract:

This paper presents an AI-driven customer intelligence system designed to enhance strategic business decision-making through data-driven insights. In modern digital environments, organizations generate vast volumes of customer data; however, extracting meaningful and actionable information remains a significant challenge. The proposed system leverages machine learning techniques, including clustering and classification algorithms, to analyze customer behavior, segment users, and predict future preferences. The framework integrates data preprocessing, model development, and visualization modules to ensure accurate and interpretable results. Experimental analysis demonstrates improved efficiency in customer segmentation and predictive accuracy, enabling businesses to optimize marketing strategies and customer engagement. The system provides scalable and efficient solutions for real-world applications, highlighting the transformative role of artificial intelligence in customer analytics and business intelligence.

Last Modified: Wed, 15 Apr 2026 12:15:06 GMT

Authors:

- jinkavedasree@gmail.com (Primary)

Primary Subject Area: Machine Learning Theories, Models and Systems

Secondary Subject Areas:

AI enabled Digital Solutions

Submission Files:

research paper.docx (129 Kb, Wed, 15 Apr 2026 12:14:36 GMT)

Submission Questions Response:

1. Paper Length
Agreement accepted
2. IEEE Format
Agreement accepted
3. File Consistency
Agreement accepted
4. Final Quality Check
Agreement accepted

Thanks,
CMT Team.
